

# CORN PROGRAM

*Zea mays*

## GROWTH STAGES

VE

V3/V4

V6/V8

VT/R1

R4/R5

R6

BIOSTIMULANT FERTILIZER

**3-5 L/ha\***

(2 applications between V3 & VT)

(It can be applied along with fungicides, insecticides, herbicides or B, K or Ca foliar applications [boom sprayer applications])

SOIL BIOLOGY ACTIVATOR

**5 - 10 L/ha\***

(Perform and incorporate a pre-sowing application into the sowing furrow, along with phytosanitary products or during post-emergence at VE & V3)

### Notes:

‰ In case of any stressful situation, these products can be used at any phenological stage different from the suggested ones.

‰ \*If a pivot is used, perform a 20 L/ha application.
